The Deadly Counterfeit Drug Trade Thrives in North Dakota

In April 2017, police broke up a drug ring based in Grand Forks which sold counterfeit fentanyl pills throughout North Dakota and part of Minnesota.

The country has seen an upsurge in counterfeit prescription pills masquerading as painkillers and Xanax. Disguised as real medications but made with deadly fentanyl or its even deadlier variants, and even a fraction of a single pill can mean death in less than 30 minutes of ingesting it.

Fentanyl is a serious threat to North Dakotans. In October 2017, the U.S. Department of Justice announced charges in Fargo against Chinese national Jian Zhang and eight other individuals. Zhang is alleged to have run a company that sold fentanyl via the dark web that caused several overdose deaths in the state.

10 North Dakota Doctors Linked to Fake Drug Rings

Counterfeit cancer drugs have touched North Dakota as well. 10 different medical practices in North Dakota have been implicated in various black market supply chains associated with counterfeit cancer treatments and other therapies. Families who have lost relatives to cancer will never know if their loved ones were given real medication or fake, and if they died from a lack of treatment.

Opening the U.S.’s closed drug supply chain puts North Dakotan lives at risk of serious injury or death.

Fake Cancer Drug Crisis

Fentanyl-Laced Counterfeits & Related Deaths

© January 2018

Based on reported investigations. Note that each investigation could have affected hundreds of North Dakota residents.
