The Deadly Counterfeit Drug Trade Thrives in Washington

59 Washington Doctors Linked to Fake Drug Rings

Counterfeit cancer drugs have touched Washington as well. 59 different medical practices in Washington have been implicated in various black market supply chains associated with counterfeit cancer treatments and other therapies. Families who have lost relatives to cancer will never know if their loved ones were given real medication or fake, and if they died from a lack of treatment.

The country has seen an upsurge in counterfeit prescription pills masquerading as painkillers and Xanax. These pills are disguised as real medications but made with deadly fentanyl or its even deadlier variants, and even a fraction of a single pill can mean death in less than 30 minutes of ingesting it.

Fentanyl is a serious threat to Washingtonians. In March 2016, DEA agents raided a house in Seattle that was being used as a fentanyl lab. Police in Yakima issued warnings in May 2016 and November 2017 about overdoses and deaths from fentanyl-laced counterfeit prescription drugs being sold on the streets. The Department of Health reported an 86% rise in confirmed fentanyl deaths between 2015 and 2016.

Opening the U.S.’s closed drug supply chain puts Washingtonian lives at risk of serious injury or death.
Fentanyl and Counterfeit Pills Made with Fentanyl

November 2017: Five overdoses due to counterfeit Xanax made with fentanyl caused Yakima Public Health authorities to issue a warning.¹

October 2017: A van left parked in a Puyallup, Washington apartment complex turned out to contain 25 pounds of fentanyl, along with 12 pounds of amphetamines and two pounds of heroin, connected to Mexican cartels.²

October 2017: Public Health—Seattle & King County announced that Washington State Patrol Crime Laboratory tests revealed a batch of pills that resembled oxycodone were actually counterfeit pills made with fentanyl.³

August 2017: Federal prosecutors accused Seattle resident Gregory L. Smith of importing pounds of raw fentanyl from China and then selling it to American drug dealers via Bitcoin.⁴

May 2017: The Washington State Department of Health reported that Washington experienced 70 lab-confirmed fentanyl deaths in 2016, an 86% increase from the previous year.⁵

May 2016: Counterfeit Xanax and Percocet made with fentanyl was implicated in two deaths and several overdoses in Yakima.⁶

March, 2016: Two Seattle roommates faced charges in federal court that they manufactured fentanyl in their home for use and sale.⁷

Black Market and Counterfeit Cancer Drugs

April 2015: The FDA sent warning letters to four Washington doctors and more than 270 nationwide to stop buying drugs from Gallant Pharmaceuticals, which sold more than 39 non-FDA approved medications.⁸

2012–2013: The FDA warned six Washington doctors offices and more than 500 across the country to stop buying from CanadaDrugs.com subsidiaries that sold American doctors counterfeit Avastin.⁹
