59 Washington Doctors Linked to Fake Drug Rings

Counterfeit cancer drugs have touched Washington as well. 59 different medical practices in Washington have been implicated in various black market supply chains associated with counterfeit cancer treatments and other therapies. Families who have lost relatives to cancer will never know if their loved ones were given real medication or fake, and if they died from a lack of treatment.

The country has seen an upsurge in counterfeit prescription pills masquerading as painkillers and Xanax. These pills are disguised as real medications but made with deadly fentanyl or its even deadlier variants, and even a fraction of a single pill can mean death in less than 30 minutes of ingesting it.

Fentanyl is a serious threat to Washingtonians. The Department of Health reported an 86% rise in confirmed fentanyl deaths between 2015 and 2016. Since March 2016, when DEA agents raided a house in Seattle that was being used as a fentanyl lab, authorities have reported more than 20 fentanyl pill-related deaths in Anacortes, Kennewick, Martha Lake, Mount Vernon, Port Town, Sammamish, Seattle, and Yakima and have shut down pill manufacturing or trafficking operations in Arlington, Bremerton, Friday Harbor, Kennewick, Moses Lake, Pasco, Port Townsend, Sammamish and Seattle.

Opening the U.S.’s closed drug supply chain puts Washington lives at risk of serious injury or death.

Opening the U.S.’s closed drug supply chain puts Washington lives at risk of serious injury or death.

The Deadly Counterfeit Drug Trade Thrives in Washington

August–September 2019, Sammamish and Seattle: Four high school students died after taking counterfeit prescription painkillers.

May 2013: The FDA warned 21 Washington doctors to stop buying medicine from an unlicensed seller who had sold a counterfeit cancer drug.

December 2018, Seattle: Law enforcement seized 11,000 counterfeit Xanax pills and a pill press from a home.
