

# FOREIGN Rx IMPORTATION: BUDGET CUTS, FDA EXPERTS IGNORED

Florida is spending **\$10 million** on a **flawed drug importation program**. Colorado, Maine, New Hampshire, New Mexico, and Vermont are following suit.

Instead of funding COVID-19 response efforts and essential programs for families and communities, states are embracing this **misguided policy** that former FDA Commissioners have long advised against.

**OPPOSE FOREIGN  
Rx IMPORTATION.**

**IT'S JUST NOT  
WORTH IT.**
