# Fake drugs have gained ground in Idaho

Counterfeit pills made with fentanyl were slow to surface in Idaho, but law enforcement across the state is increasingly concerned about them.

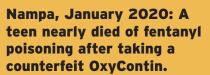

In the first five months of 2021, five Kootenai County residents died over an eight-day period after taking products spiked with fentanyl, including fake pills, and police in Nampa and the Lewis Clark Valley made fentanyl pill seizures. In 2020, residents of Nampa and the Nez Perce Reservation barely survived fentanyl poisoning from fake oxycodone. Law enforcement in Coeur d'Alene and Nampa first reported seizing the pills in 2019.

Kootenai County, May 2021: five people died from fake prescription pills or other drugs that contained fentanvl.

Pocatello, January 2019: A man received a two-year sentence for importing and transshipping illegal steroids.

## Counterfeit medical products are as available online in Idaho as they are across the U.S.

In 2019, a plastic surgeon in Burley admitted to implanting **illegally imported**, non-FDA approved breast implants in nine patients.

A man in Boise died after ordering pills from a fake online pharmacy that sold him counterfeit painkillers in 2017.

Between 2012 and 2016, the FDA warned seven Idaho doctors to stop buying Botox from unlicensed sellers that had been caught selling counterfeits
