

THE DEADLY COUNTERFEIT DRUG TRADE THRIVES IN MASSACHUSETTS

Lawrence, February 2019: One-year-old girl overdosed after putting a fentanyl-laced counterfeit pill in her mouth.

Stoughton, March 2019: Pill press seized along with 10,000 counterfeit Xanax pills during raid on a rented office space.

Palmer, February 2018: Man sentenced to two years in prison for importing and selling misbranded prescription drugs from Pakistan.

59 MASSACHUSETTS DOCTORS LINKED TO FAKE DRUG RINGS

Counterfeit cancer drugs have touched Massachusetts as well. 59 different medical practices in Massachusetts have been implicated in various black market supply chains associated with counterfeit cancer treatments and other therapies. Families who have lost relatives to cancer will never know if their loved ones were given real medication or fake, and if they died from a lack of treatment. 

OPENING THE U.S.'S CLOSED DRUG SUPPLY CHAIN PUTS WASHINGTON LIVES AT RISK OF SERIOUS INJURY OR DEATH.

THE COUNTRY HAS SEEN AN UPSURGE IN COUNTERFEIT PRESCRIPTION PILLS MASQUERADING AS PAINKILLERS AND XANAX.

These pills are disguised as real medications but made with deadly fentanyl or its even deadlier variants, and even a fraction of a single pill can mean death in less than 30 minutes of ingesting it.

Fentanyl is a serious threat to Massachusetts. In February 2018, "Operation High Hopes" ended with the arrest of 37 individuals associated with a major drug ring and the seizure of 33 pounds of fentanyl. That amount of fentanyl could kill nearly five million people. In November 2019, several pill presses and 5,700 grams of fentanyl powder were seized in Roxbury.
