RESOURCE 🍷 r/Lean Feb. 2021 U.S. Pricing Guide self.lean

Submitted 9 months ago * by [BigBlueOG](#) [Actavis](#) M

These prices are from the start and height of the Covid pandemic and everything basically tripled, if things are cheaper now, lmk!

These are Cali prices (2x) NY prices are (1.5x) any everywhere else is pretty much half these prices including Texas due to dilution basically!!

If anybody gives you any price higher than here you send them this link - https://old.reddit.com/r/lean/comments/1e92nk/rlean_feb_2021_us_pricing_guide/

old one:

https://www.reddit.com/r/lean/comments/iw49te/rlean_q3_2020_pricing_guide/

These are 2021 prices so let me know what the new ones should be!

Maybe I can link pics/vids next to each brand and add missing ones when they're made/posted.

I remember looking on Google and stuff trying to find real pint/seal images for reference, it was so hard years ago, now this place acts as a collection hub for all things Lean, that's why the goal is to one day have reference material for every brand, at the very least to gawk over.

This is a hybrid list of taste and rareness/sought-afterness aka price. Perhaps a desirability list is a better name for it.

Prices are of Feb. 2021

Buying individual lines/script bottling might be a bit more expensive and buying whole pints might be a bit money saved

1oz = 1 U.S. fluid oz aka "a line", "one line", "ounce", 30mL

16oz = 1 Pint, 473mL

1 Gallon/Gal. = 8 Pints or 128oz

So, even though Barre and Alpharma might be more medicine-y than "candy" Actavis I'm told, as Barre/Alpharma is even older and more rare like Qualudes it's worth even more.

This is a hybrid list of taste and rareness/sought-afterness aka price. So

If you have a brand that "rusts" and it's well preserved, that's obviously better/a tier above than rusted stuff. But some non-"rusted" Dinos can be fakes as well

- 1) Barre Drug Co./Barre-National Gallon (I think they maybe only ever made VC Gallons though, [/u/BarreNational?](#)) 🍷🌿🐸🏆 - CONFIRMED DID EXIST!
- 2) Alpharma Gallon 🏆 (Rumored, but probably exists!)
- 3) Barre 8oz - Green or Pink label not sure if either is older or more valuable or anything like if they were region based 🍷🌿🐸

Barres used to come in plastic sealed 6(?)pks, and 24-48(?) bottles in cases - once would be cheaper due to bulk but now more expensive due to insane rarity

- 4) Barre 4oz 🍷🌿🐸
- 4b) Barre pharmacy bottle (believed 8oz here) - <https://i.redd.it/64rftvqbfd11.jpg>

It's not just cough syrup, but it is actually really good at doing its job of being a cough syrup. It has been treated unfairly.

- 5) Alharma Pint 🍓🌿🦎

All pints come in cardboard cases of 12 - once would be cheaper due to bulk but now more expensive due to rarity

- 6) Alharma 8oz 🍓🌿🦎
- 7) Alharma 4oz 🍓🌿🦎
- 8) Actavis Pint w/ Teva outer seals 🏆 (Pint \$15,200/\$950 per 1oz) 🍓🌿🦎
 - 8b) Actavis 8oz - they stopped making in 2008, not sure which should be first. But this is more rare but very likely not worth more than a Pint, (8oz \$8,000/\$1,000 per 1oz) 🍓🌿🦎
 - 8c) Actavis Pint w/ black text "Sealed for your protection" outer seal 🏆 (Pint \$15,200/\$950 per 1oz) 🍓🌿🦎
- 9) GlassTech/with Box and bubble wrap - worth more, maybe only given to pharms. so you'd need a backdoor hookup back in the day to get it, but same with the gallons haha (Pint \$12,000/\$750 per 1oz) 🍓🦎
- 9b) GlassTech without Box (Pint \$9,600/\$600 per 1oz) 🍓🦎
- 10) Qualitest Glass 8oz 🍷🌿🦎
- 11) Qualitest Glass 4oz 🍷🌿🦎
- 12) MGP Rectangle Pint 🍷🦎🦎 (was MGP better or worse than Wock CS/Wock OS?)
 - 12.5) (Pint \$8,000/\$500 per 1oz)
- 13) MGP Cylindrical Pint 🍷🦎🦎 (was MGP better or worse than Wock CS/Wock OS?)
- 14) Actavis 4oz 🍓🌿🦎
- 15) Wockhardt Cough Syrup Pint (Pint \$8,800/\$550 per 1oz) 🍷🦎
- 16) Qualitest Rectangle Pint 🍷🌿🦎
- 17) PlasTech Pint (Pint \$6,400/\$400 per 1oz) 🍓🦎
- 18) Sun Pharma Pint - dark green (Pint \$5,600/\$350 per 1oz) 🍷🦎
- 19) Qualitest Cylindrical Pint (Pint \$4,800/\$300 per 1oz) 🍷🌿🦎
- 20) Sun Pharma 4oz 🍷🦎🦎
- 21) Akorn Syrup Pint (Pint \$5,440/\$340 per 1oz) 🍷🍓🦎
- 22) Akorn Oral Solution Pint (Pint \$3,000/\$250 per 1oz) 🍷🍓
- 23) Wock Oral Solution Pint Booklet - I wouldn't really say the old booklet variant is worth more but maybe, I think Hi-Tech or others had a booklet removed/added 🍷🦎
 - 23b) Wock Oral Solution Pint non-booklet (Pint \$3,500/\$200-\$300 per 1oz) 🍷🦎
- 24) Par Pint (Pint \$3,200/\$200 per 1oz) 🍷🌿🦎
- 25) Pai Pint (Pint \$3,200/\$200 per 1oz) 🍷🌿
- 26) Tris Pint - beautiful but minty af, some like it (Pint \$3,000/\$200 per 1oz) 🌿🍓🦎
- 27) Nostrum Pint - light Baja blast green (Pint \$1,920-\$2,880/\$120-\$180 per 1oz) 🍷🦎

Nostrum is all around but people who still hate on green will go low on it

- 28) Qualitest plastic 4oz 🍷🌿🦎
- 29) Par 4oz (4oz \$900/\$225 per 1oz) 🍷🌿🦎

Im in ny 4oz for 650 all day

SipLean Infographic

(Infographic Needs To Be Updated & Fixed)

(need updated, trying to soon! This is from few years ago!)

Lean-also known as drank, purple drank, sizzurp/syzzurp, syrup, AC/DC, Barry, barr/barre, crow(crowbar-re), down, oil, purple jelly, wok, Texas tea, Act, Captain Cody, Cody, Schoolboy, Karo, Maxo, Memphis Mud, Nods, Pimp C, Purple Sprite, Doors & Fours, Loads, Pancakes and Syrup, Tsikuni, and Yams, dirty Sprite-is a combination of the following:

- Cough medicine with Promethazine & Codeine usually at a ratio where there's 1.6x the amount of Codeine than Promethazine. And additionally is 7% medical-grade alcohol.
- Soft drinks
- sometimes Hard, fruit-flavored candy
- and the dose taken is larger than what is recommended on the bottle for medical use

*Safety/Addiction/and OD prevention resources will continually be added/updated.

- **Lean = Promethazine + Codeine** (some say with 7-8% volume being 190 proof alcohol as well)
- **U.S. Pharmacy Lean ratios are 1.6x the amount of Codeine than Promethazine.** 10mg/5ml Codeine Phosphate & 6.25mg/5ml Promethazine HCL/Hydrochloride
- **Normal dosages:** 2-4 U.S. fluid oz

Tips:

It takes 4-5 hours for your stomach to empty, I eat 1 portion of something in that time before sipping.

1 portion of pizza is often 1 slice

An average home frozen pizza should be cut into 6 slices, not 8!

Weed helps the high

Tobacco/(Nicotine) helps even more too! It helps a lot, more than weed even.

Avoid stimulants that'll be counterproductive to the sedating Lean, like coffee/cafeinated sodas. or amphetamines.

Sip slow, if you're getting hit with it you don't have to finish your cup right then or at all, but maybe try to save that Lean for future use!

Make sure to pour some soda out to make room for the Lean!

You can make ice cubes out of the soda you'll use to prevent watered down drank!

8oz is the most Lean anyone should ever drink! And 12oz would be considered deadly!

- **Peak usage of Codeine = 480mg / 8oz of U.S. Pharm. Lean! The VERY MOST anyone should EVER have of normal dosed Lean is 8oz** (2 experienced users splitting a Pint/16oz isn't unheard of) anything more than that is excess Promethazine intake and you will not intake any more Codeine + you're throwing off the 1.6x ratio.
- **Codeine at 480mg this high a dose is bad for your body** especially if you don't have a tolerance built up to the drug/don't know if your body handles the drug well. So experienced users only! Tread at your own risk! You know your body better than anyone else!
- **12oz of U.S. Pharm. is considered deadly for anyone** due to the high

Updated pricing from what I can see in La Wock 35 a seal 2-300 a line, tris is around 3k and 200 a line, nostrum is all around but people who still hate on green will go low on it, akorn is starting to lower again but is still 3500 ish, the new PAI I'm sure will be taxed for the first month or so but since it's par I expect it to sell for cheap after it's in circulation, it may even cause the other brands to get cheaper since shitty tasting purp is out; but as for the Dino's they are all the same if not even more than last year

the taste for nostrum codeine is a bit more bitter while the plain nostrum green is kinda sweeter

[permalink](#) [embed](#) [save](#) [parent](#) [report](#) [reply](#)

Codeine intake (720mg!) and high Promethazine intake (450mg!)

- **Tolerance to Codeine is built rather quickly**, so to receive the same 1:1 effect from Lean you should make sure to not be taking any other Opiates/Opioids/even Cocaine as well also take a day off at least per 1oz you drank before. Example: Drink 2oz of Lean, take 2 days off, have 2oz again and that 2oz should feel the same as it did before! (if not, maybe a little more time to completely feel like you've reset your tolerance) Drinking 2oz then 2oz the next day, the 2oz won't feel as strong so you can drink 3-4oz to compensate but they also won't feel as strong as they can.
